PETROLEUM

COMPANY PROFILE

Welcome

Welcome to US Global Petroleum!

US Global Petroleum is a manufacturer and a global distributor of API licensed quality lubricants, hydraulics and chemicals. We started our business in 2008 and expanded in 2011 by acquiring the Conoco Phillips plant in Franklin Park, Illinois, and since have enjoyed rapid business growth.

The plant was previously owned by both Shell and the Magie Brothers Oil Company, a name that has been in the oil business since 1900. The Magie Brothers Oil Company moved through several locations in the Chicago area in the 20th century with its last stop in Franklin Park, IL, where US Global is now operating. We are proud to be a part of that oil industry evolution and we merge it with the most innovative technology, equipment and knowledge base.

Today, US Global annually delivers more than 20 million liters of the finished product blended under precise supervision and quality control of US Global chemists and engineers. Our customers are wholesale automotive aftermarket distributors, retail chains, gas stations and government agencies that demand the best value from a reliable long-term business partner.

We offer the most competitive manufacturing prices and uncompromised "made in the USA" quality and service. We continuously develop a knowledge base for our customers to help them understand the latest technology trends in the industry. We sell more than oil - we offer ongoing customer support and build strong business relationships to grow our business together with our customers.

Our vision is to be a true partner to our customers and suppliers alike. So let us know how we can help you with your business, because your success is our success.

We welcome our business partners to tour our plant. Please contact the US Global sales team to schedule your visit.
